

Demonstrator MK3

bathomatic® / bathovision® / iShower®

Fully automated demonstrator incorporating bathomatic®, bathovision® and iShower® control management systems are available for retail use. Designed to provide a practical sales tool showing bathroom automation in action it demonstrates to customers the unique features of products and concepts not previously known.

The unit clearly demonstrates the bath filling process where pre-programmed depth is always achieved and maintained automatically. The shower comes on to visually displaying flow control and bathovision® demonstrate picture and lighting control.

There is a macro card which when ON fills the bath tub to the first preset then drains the bath, following this the shower comes on for a preset period of time and it is all repeated over. The observer can see on the bathomatic® Basic User Interface the change of depth and temperature, which demonstrates that bathomatic® is always aware of the water in the bath and can act if instructed. The LED colour light cycles drawing attention to the water action, which is particularly effective when the demonstrator is left at the shop window during the night.

A small tank is incorporated in the plumbing independent option and the water is re-circulated.

With a small footprint of only 700mm wide (the width of a normal bath) and 490mm deep this unit can be accommodated with ease in any showroom. It has a height of 1980mm. When dismantled into three parts it can be transported in most estate cars.

In addition to demonstrating the technology to customers it can be used as valuable testing and training tool.

Key features:

- Unique and stylish working display
- Integrated portfolio featuring:
 - bathomatic®
 - iShower®
 - bathovision® 23" TV
- Working model engages interest
- Clearly conveys the system's features
- User friendly interactive touch control
- Demonstration mode can be pre-set
- Minimal showroom space required
- Self contained unit – no plumbing required*
- Potential for good ROI
- Dims: 700 (W) x 490 (D) x 1980 (H)
- iPhone or LAN control
