

bathomatic / bathovision

demonstration unit for retailers

bathomatic™ / bathovision™ demonstrator

Fully automated retail demonstration units are available for the bathomatic™ microprocessor-controlled bath management system. These demonstration units have been designed to provide the retailer with a unique and practical showroom sales tool to explain digital bath automation in action to customers, and demonstrate the bathovision™ range of bathroom TVs and Rako wireless lighting control.

The unit clearly demonstrates the bath filling process where pre-programmed depth is always achieved and maintained automatically. The pre-programmed bath water temperature is also displayed.

The bathomatic™ system can be controlled from one or more minimalist all-glass, wall mounted touch screens. The bathomatic™ system can also be controlled from any other location via a PC (LAN / RS232) and a mobile phone or an automation system. By using the rimote™ handheld controller the bathomatic™ can, in addition, be controlled by a bathovision™ bathroom television via on-screen menus. A standard 23" bathovision™ frameless heated mirror bathroom TV is housed in the demonstrator unit.

Bathroom and general lighting is controlled by the Rako wireless controlled lighting switch module housed in the showroom demonstrator. This range of wireless switchplate can be installed almost anywhere without the necessity for wiring.

Key features:

- Unique and stylish half bath working display
- All-glass demonstrator surfaces
- 2 basic user interfaces + Rako wireless lighting control
- bathovision™ 23" TV
- Working model engages interest
- Clearly conveys the system's features
- User-friendly interactive touch control
- Demonstration mode can be pre-set
- Showing the latest in bathroom TVs
- TV: heated screen, frameless construction
- TV: HD Ready, Freeview
- TV: Home automation interface
- Minimal showroom space required
- Self-contained unit – no plumbing required
- Potential for good ROI
- Dimensions: 700 x 505 x 2040 mm
