Unique Automation's ultimate controls

unique automation

Bathomatic is a digital bath filler that can be controlled from a small, wall-mounted touch-screen pad or any other location via a PC (WAN*) or automation system. This new technological advancement, developed by Unique Automation, can be installed into any new bath or retro-fitted, due to its unique motorised waste assembly.

When activated, bathomatic lowers the motorised plug, fills the bath tub from the overflow or an outlet on the side of the bath to a predetermined level and temperature. The controlled filling has further benefits of preventing flooding and scalding, whilst saving energy and water.

The filling process is

microprocessor-controlled and the pre-set temperature and level are always achieved, regardless of temperature and pressure fluctuations of the incoming water. Bath water is monitored within the waste assembly, which incorporates a conventional overflow and is equipped with pressure and temperature sensors. With the basic bathomatic model, the water temperature is maintained by letting out cooled water and replenishing with hot water maintaining the level.

victoria ⊕ albert®

volcanic limestone baths

Big-small appeal from Victoria & Albert

The ios bath receives its worldwide launch by Victoria & Albert on stand D28. Made from QUARRYCAST, a rare volcanic limestone mixed with resin, the ios is a solid one piece bath that aims to rewrite the rule book about size and comfort. Described as part of the new 'big-small' design philosophy, an incredibly compact 1,500mm long footprint is matched by an impressive 390 litre capacity and double-ended layout.

And the minimalist ios doesn't feature an overflow. To achieve great clarity of form, the bath's pure oval lines are entirely unbroken - no rim, no overflow pipework; the integrated apron hides all waste plumbing under the bathing well. Like all V&A baths, it comes with a 25 year guarantee.

Plan ahead with VR Design

VR kitchen, bedroom and bathroom design software makes things easy for you. Find out more on Stand M16, Hall 17 at KBB 2008.

With over 20 years experience in the world of 3D CAD visualisation, we're making it easier for you to sell more Kitchens, Bedrooms and Bathrooms.

Visit stand M16 Hall 17 at KBB 2008 to find out how VR 3D design software creates an even more impressive customer experience, enabling you to produce powerful three-dimensional displays within

minutes. Why give customers time to 'cool off' or visit alternative showrooms, when you can present sale-winning designs immediately?

We'll also be demonstrating the new VR Cabinet Maker and VR Planner software, so please visit the stand for more information. It couldn't be easier!

making things easier for you

Golf, VR-style.

With over 20 years experience, we're making the world of 3D CAD visualisation easier. Our latest system is fast, effective and incredibly easy to use. You just 'drag and drop' elements into position - and changes to colour and style are just as simple. So you can show clients a life-like, walk-through view of their new kitchen, bedroom or bathroom. Which means more sales for no more effort.

For a free demo CD, call 0114 267 0101.
